

6.S974 Games, Learning, and Security

Erich Trieschman

September 21, 2026

1. Relief logistics.

- (a) *Min-cost flow problem.*
- (b) *Fully loaded containers.*
- (c) *Extreme events.*
- (d) *In code.*

2. Security Inspections in a Shared Building

- (a) *Strictly dominated actions.*
- (b) *Pure strategy Nash equilibria.*
- (c) *Nash equilibria with randomizations.*
- (d) *Correlated equilibria.*
- (e) *Building manager announces both recommendations.*

3. Human-AI Delegation.

- (a) *Extensive form game tree.*
- (b) *Pure strategies and subgame perfect equilibria.*
- (c) *Strategic form payoff matrix*
- (d) *Perfect subgame Nash equilibria?*
- (e) *Thinking after review and subgame perfect equilibria.*

4. Autonomous pricing.

- (a) *Strategic form game.*
- (b) *Subgame perfect equilibria.*
- (c) *New strategy profile.*
- (d) *Permanent punishment.*
